

Client Case Study

Client Name:

Comet Electric, Inc.

Company Type:

Electrical Contractor

Project Title:

CAT5 to CAT5e Network Wiring Upgrade and Server Room Build-out

Scope of Work:

Third-party wiring contractor to remove old wall-mount wiring rack, install new rack, and terminate all new CAT5e data runs for gigabit network support. Soft Point Media coordinated the wiring contractor, installed new gigabit network switches and did all final wiring after patch panels were installed. Also relocated all servers from existing cabinet to new shared server closet with dedicated network runs and server room air conditioning. Project also coincided with the installation of a new primary domain controller, Exchange server, and file server.
